

SLIDING DOOR HARDWARE
FOR RESIDENTIAL PROJECTS

Editorial

For over a century, the Manton group has been developing its business designing, making and selling sliding fittings for the building trade. Recognized today as one of the global leaders in our market, we always strive to anticipate and provide reliable and easy-to-use solutions for customer's home and work environments.

In that same spirit and driven by the love of a well-designed product built to last, in the last few years we have been investing in automatic controls for doors and windows, in a direct progression from our original products. Considering this a strategic area of development, we chose to develop and manufacture our own automatic control products in our subsidiary Manton SMT based in Genlis in the Côte d'Or region of France. After pioneering the use of automatic controls for sliding shutters and then becoming

the benchmark on the market for automatic controls for swing shutters, we are now able to bring you the most reliable, easy-to-use automatic control for sliding doors available on the market.

The benefits of working with Manton:

- Manton R&D department works with our clients to customize and adapt our products regarding their needs.
- Manton has made a serious commitment to North America to be able to serve our customers by investing in inventory and warehouses on this continent.
- A North American team is living and working in the USA and Canada to support our clients: architects, AHC, distributors and industrials (OEM).

A passion for the product

Manton is based in Franche Comté, a region of France with a proud industrial past and a long-standing reputation for precision mechanical engineering and watchmaking. This culture is deeply ingrained in our staff, who are motivated by a constant quest for excellence and technical innovation.

Strong social ethics

We attach great importance to the human aspects of business and the management of our people, without whom none of our achievements would be possible. This means that we pay particular attention to **gender equality** and **professional development**.

We are convinced that we can only benefit by opening up the company to its environment and so we encourage exchanges with the **academic and cultural worlds**, regularly hosting students on placements, training apprentices, developing partnerships with schools and universities and occasionally offering industrial sponsorships, thereby highlighting our employees' expertise and putting it to good use.

Our presence abroad, which dates back more than 50 years, has helped to shape an **open and culturally diverse** mindset at Manton. Our teams include people of a dozen nationalities who all work together on a daily basis, constantly interacting with customers located in over 80 countries on 5 continents. This environment gives the company an exceptional culture of openness that benefits everyone.

The sustainability: always a central concern

Certified ISO 14001, we have already been working for over 30 years on minimizing the environmental impact of our products.

Pioneers in our field in the use of lightweight materials such as high strength steels (1990) and for the total elimination of chromium from the surface treatments of our products (2003).

Committed to making the sustainability of our products a priority, we have turned this ambition into a reality with warranties of up to 25 years on some products.

SAF® TWIN

Product sheet

SAF® TWIN is a 2 or 3 doors closet system that personalizes and delivers reliable results. Our double track system ensures the doors will function effortlessly due to the dual track part. Like many of our systems, it is silent and smooth making it perfect for any environment. This system is particularly easy to mount.

TANGO

Product sheet

TANGO is a bifold system that delivers a smooth and seamless operation, ideal for hospitality and higher education. This system includes standard and premium hinge options. The premium hinge creates a nearly invisible gap between the panels yielding a more sophisticated appearance to your space.

SAF® POCKET

Product sheet

When every square foot in your room matters SAF® POCKET is the system for you. It utilizes our high-end sliding pocket system to maximize every inch of your floorplan. This system is recessed into the wall and ensures no spatial compromises to your space. It enhances the room's overall ambiance and delivers an easy solution for your individual design needs.

SAF®

Product sheet

Looking for a no fuss, yet sophisticated high-quality system for separating any of your spaces? The SAF® Collection offers three weights for a wide range of needs using wood or metal framed doors. This system is designed to provide a highly desirable silent user experience. Its soft close system helps ensure your door will never be half open, even if you forget to close it. The system offers many options that deliver solutions to your individual design needs.

Sleek design and silent operation!
4 new-generation **SILENCE**
soft-closers

ROC® DESIGN

Product sheet

The ROC® DESIGN has 6 different roller styles, all offered in matt black, based on the designs of historic sliding door fittings manufactured by Mantion dating back to 1935. Nearly one hundred years later, the classic design was perfected by our designers to meet the expectations of the most demanding customers. The ROC® DESIGN system combines a unique character with the latest technical solutions.

Product sheet

SAF® SLIM

SAF® SLIM has a discreet, sleek and modern design for a minimalist look in a sliding hardware solution. This ultra-thin design has a very small gap between the door and track making for an extremely refined aesthetic. With modernism in mind, we offer this product in either natural brushed anodized or black brushed anodized finishes.

SOME OF OUR ACHIEVEMENTS

PLACE 10 RESIDENTIAL COMPLEX PROJECT

Located in Calgary, Alberta, the Place 10 Residential Complex will see the construction of 2 residential towers. Construction began in October 2020.

Our partner, **AMCO Distributors**, installed 1,014 items of our **MA serie**, for closets and sliding doors of the 864 units featured in the first tower.

STATION PARK PROJECT

Located in Kitchener, Ontario, the Station Park will also see the construction of 2 residential towers. Construction began in April 2020 and should end in 2022.

Our partner, **VanMar Constructors**, provided 1,034 items from our **SAF-TWIN collection** for closet doors for these 2 condo towers 18 and 28 storeys high.
